

Murals

Murals are a very effective way of transforming a space; they can create life and energy in a place that is lacking character. They can be painted in all types of environments, inside or out.

A child's bedroom can be brought to life with a mural giving them a lasting and special childhood memory. A mural painted for a business, whether it be for a shop, a restaurant or a play centre can give that business a unique and personal feel that sets it apart from its competitors.

Take a look at some of the murals I have created in people's homes and businesses, for children and for adults.
